- ☐ any table(s) related to the sequence listing (*specify*): _____

* If item 4 applies, some or all of those sheets may be marked "superseded."

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/US05/13793

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>1-20</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>1-20</u>	YES
	Claims <u>NONE</u>	NO
Industrial Applicability (IA)	Claims <u>1-20</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and Explanations (Rule 70.7)

Claims 1-9 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest that identifying an inter-switch route for the call from the first switching node to the second switching node, wherein an intermediate switching node includes a plurality media gateways; selecting an intra-switch route within the intermediate switching node from a plurality of intra-switching route within the intermediate switching node for establishing the inter-switch route, each of the plurality of intra-switch routes including at least one interconnection between media gateways; and connecting the call using the identified inter-switch route and selected intra-switch route.

Claims 10-18 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest that a server operable to control routing for the plurality of media gateways, the server operable to select, for a call connection, an intra-switch route including a first media gateway, and at least on interconnections for connecting the first media gateway and the second media gateway, the intra-switch route selected from a plurality of intra-switch routes designated for serving call connections routed through the first switching node and the second switching node.

Claims 19-20 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest that identifying a first media gateway and a second media gateway of the plurality geographically distributed media gateways for use in routing the call from the first switching node to the second switching node; identify an interconnection route list corresponding to a routing between the first media gateway and the second media gateway, the interconnection route list having a plurality of different interconnection routes between the first media gateway and the second media gateway; determine an availability of at least one of the different interconnection routes; and allocate the selected interconnection route for use in routing the call from the first switching node to the second switching node.
